

STEVE MANN

EQUIVEILLANCE IS THE BALANCE BETWEEN SURVEILLANCE AND SOUSVEILLANCE

Share first-hand recording activity...

Glogger Community: <http://glogger.mobi/about/php>

Steve Mann, cyborg, inventor, engineer, artist, activist, invites the Cooper Community to join the Glogger Community at <http://glogger.mobi/about/php>.

The project is an online platform for sharing first-person recording activity (a "glog" is a Cyborg Log in the same way that a blog is Web log). Mann encourages members of the Cooper Community to photograph surveillance apparatus together with the environments under surveillance, as well as the perpetrators and purveyors of the surveillance superhighway and upload the images to the Glogger Community Web site.

Be sure to include the keywords "sousveillance," "equiveillance," "Cooper," with the image, so that the images can be searched and commented upon by Mann and others.

For reference material, see Steve Mann, "Existential Technology: Wearable Computing Is Not the Real Issue . . . (Identity and Privacy Issues of Wearable Computing and Existential Technologies)," Steve Mann's Web Page / Research, http://wearcam.org/id/id_leonardo.htm.

Steve Mann completed his PhD at the Massachusetts Institute of Technology (MIT), where he founded the wearable computing group as a part of the MIT Media Lab. Mann is considered by many to be the inventor of the WearComp (wearable computer) and WearCam (EyeTap and reality mediator). Mann is a professor in the Department of Electrical and Computer Engineering at the University of Toronto.
